EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Roger Lee on March 20, 2006.

The application has been amended as follows:

2. Specification, page 1, below title, as line 1 - - This application is a 371 of PCT/JP03/04998 filed April 18, 2003. - -
3. The following is an examiner's statement of reasons for allowance: The declaration under 37 CFR 1.132 dated 3/20/06, demonstrates that the cited prior art of record, EP 1182470A1, even in combination with US 6,020,945, US 5,852,487 and US 5,412,044, fails to teach a rod-shaped compound which exhibits a maximum absorption wavelength of shorter than 250 nm in an ultraviolet absorption spectrum measured in a form of a solution of the compound. Furthermore, the declaration shows that the claimed rod-shaped compound, which exhibits a maximum absorption wavelength of shorter than 250 nm in an ultraviolet absorption spectrum, measured when the rod-shaped compound is in a form of a solution of the compound, does not exhibit undesirable colors in dark, bright and medium tone images, compared to the

compounds of EP 1182470A1, which is indicative of unexpected results. See Applicant's remarks dated 03/20/06.

4. The terminal disclaimer and statement of common ownership of copending application 10/471,560, dated 3/20/06, has removed said application as valid prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
